## About the Survey

---

---

### 1. Survey content

- I. Survey of Expenditure for Corporate Philanthropic Activities
- II. Corporate Philanthropic Activity Case Studies (Conducted every three years)
- III. Special Surveys on Corporate Philanthropic Activities (Survey on Activities Related to Reconstruction after the Great East Japan Earthquake and Survey on Recovery and Reconstruction after the 2016 Kumamoto Earthquake)

### 2. Survey period

May to August 2016

### 3. Survey target audience

Member companies of Keidanren and corporate members of the 1% Club: Total of 1,363 companies

### 4. Number of respondents

- I. Survey of Expenditure for Corporate Philanthropic Activities: 334 companies and groups  
(24.5% response ratio) (incorporates responses from approx. 11,700 companies, if consolidated companies are included)
- II. Corporate Philanthropic Activity Case Studies: 335 companies (24.6% response ratio)
- III. Special Surveys on Corporate Philanthropic Activities
  - Status of Activities Related to Reconstruction after the Great East Japan Earthquake: 358 companies (26.2% response ratio)
  - Examples of Activities Related to Reconstruction after the Great East Japan Earthquake: 242 companies (17.8% response ratio)
  - Status of Activities Related to Recovery and Reconstruction after the 2016 Kumamoto Earthquake: 358 companies (26.2% response ratio)
  - Examples of Activities Related to Recovery and Reconstruction after the 2016 Kumamoto Earthquake: 275 companies (20.2% response ratio)

# Introduction

---

Japanese companies began undertaking corporate philanthropic activities in earnest in the 1990s. As global interest in corporate social responsibility (CSR) grew in the 2000s, companies considered such activities as one of the management matters, and today they adopt original and ingenious approaches to a diverse range of initiatives, often conducted from the perspective of creating new social value with a view to the sustainable development of society. Presentation of quantitative as well as qualitative data is vital to promoting broad-based public understanding of such corporate efforts.

To this end, every year since 1991 Keidanren and the 1% Club have conducted a Survey on Corporate Philanthropic Activities targeting Keidanren member companies. As well as analyzing trends in corporate philanthropic activities, we examine various issues to further encourage corporate initiatives.

This year, in addition to the annual Survey of Expenditure to ascertain corporate spending on philanthropic activities, we conducted the triennial Case Studies to identify companies' distinctive corporate philanthropic activities, and Special Surveys on reconstruction efforts following two large-scale disasters that have occurred in recent years, the Great East Japan Earthquake and the 2016 Kumamoto Earthquake. A large number of enterprises and corporate groups responded to these surveys. We would like to sincerely thank all the respondents who spared the time to cooperate in the survey by submitting detailed data.

Based on the results of these surveys, Keidanren and the 1% Club will continue to extend discussion of various issues relating to corporate philanthropic activities.

7. Social welfare and social inclusion	(8) 5.3%	(8) 5.6%	5.2%	
8. The environment	(7) 6.5%	(7) 7.3%	4.4%	
9. International exchange and cooperation	(9) 1.8%	(9) 2.5%	1.8%	
10. Political donations	(10) 0.9%	(11) 1.1%	1.0%	
11. Capacity building for NPOs/NGOs	(11) 0.7%	(10) 1.1%	0.9%	
12. Creating jobs, promoting skills development, and providing assistance in employment	(12) 0.6%	(12) 0.8%	0.7%	
13. Community disaster-prevention and crime prevention	(13) 0.4%	(13) 0.6%	0.3%	
14. Human rights and human security	(14) 0.1%	(14) 0.3%	0.1%	
15. Others	10.2%	8.3%	8.2%	

# I. Survey of Expenditure for Corporate Philanthropic Activities

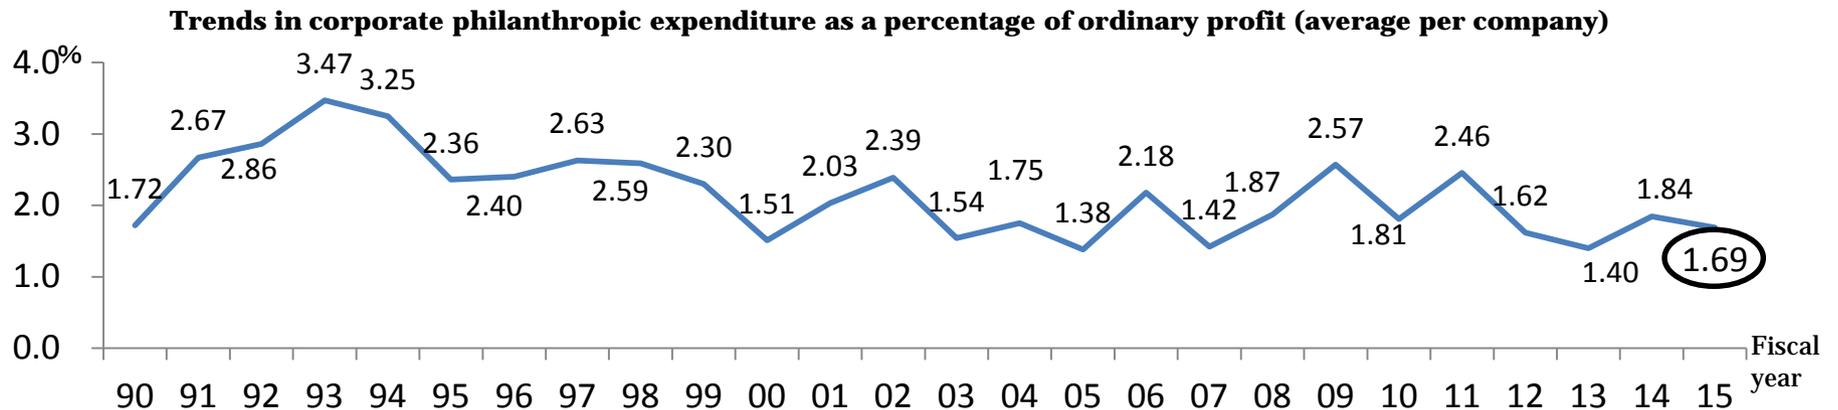

## 3. Corporate philanthropic expenditure by capitalization bracket

◆ A correlation can be seen between capitalization and corporate philanthropic expenditure.

## 4. Corporate philanthropic expenditure as a percentage of ordinary profit

◆ Corporate philanthropic expenditure accounted for 1.69% of ordinary profit.

# I. Survey of Expenditure for Corporate Philanthropic Activities

## 5. Itemized breakdown of average expenditure per company

◆ A breakdown of average expenditure on corporate philanthropic activities per company shows that donations accounted for ¥406 million (75%), company-organized and collaborative programs ¥110 million (20%), and assistance to disaster-stricken areas ¥23 million (4%).

Itemized breakdown of expenditure for corporate philanthropic activities per company

Corporate philanthropic expenditure: ¥490 million per company	Donations	¥406 million (75%)	Monetary donations	¥305 million (75%)
	Company-organized and collaborative programs	¥110 million (20%)	Donations in kind	¥17 million (4%)
	Assistance to disaster-stricken areas	¥23 million (4%)	Giving access to facilities	¥13 million (3%)
	Others, no specific category	¥2 million (0%)	Dispatch of personnel	¥37 million (9%)
			Others	¥34 million (8%)
			Related to Great East Japan Earthquake	¥19 million (83%)
			Other disasters	¥4 million (16%)

Notes 1. Amount for each item: Expenditure for each item/Number of respondent companies (334)

2. Since numbers are rounded, totals may not tally.

## 6. Corporate expenditure on assistance to disaster-stricken areas in fiscal 2015

◆ Expenditure totaled ¥7.6 billion, of which ¥6.3 billion was for assistance related to the Great East Japan Earthquake.

Breakdown of corporate expenditure on assistance to disaster-stricken areas in fiscal 2015

	Expenditure on assistance to disaster-stricken areas (contributed by companies)			(Reference) Expenditure on assistance to disaster-stricken areas contributed by employees, consumers/customers, etc.		
	Expenditure (Total)	Expenditure related to Great East Japan Earthquake	Expenditure related to other disasters	Expenditure (Total)	Expenditure related to Great East Japan Earthquake	Expenditure related to other disasters
Expenditure	¥7.6 billion	¥6.3billion	¥1.2 billion	¥0.9 billion	¥0.2 billion	¥0.6 billion
Number of companies providing assistance	246	188	165	106	66	67

Notes: 1. Amounts from donations solicited by companies from employees, consumers, etc. via fund-raising among employees and in stores.

2. Since numbers are rounded, totals may not tally.

## II. Corporate Philanthropic Activity Case Studies

---

◆ The case studies gather details of companies' policies and internal systems relating to corporate philanthropic activities as well as examples of specific activities. Responses provided 832 examples of specific activities from 321 companies.
